Master| Spatial Economy | 2018
specialization: Estates Market

Bachelor | Management| 2016
specialization: Team leadership

MOTIVATIONAL LETTER

JUNIOR SOFTWARE TESTER

I graduated from the Wroclaw University of Economics where I learned a lot from economics, finance, management, and IT science. I participating in Software Development Academy right now. At the beginning of my career for over 4 years, I explored the marketing secrets of the largest festival brands in Wroclaw (European Capital of Culture 2016, The World Games 2017). Next, twice in the holiday season, I worked in the United States where I experienced how everything functions in a culturally different image. I packed my baggage of experience and I start a new career path which I am fascinated with — it is a new technology industry. I would like to go deeper into **Quality Assurance** and everything connected with the **testing in software development**. This is my goal where I follow. Besides I am a positive person, sociable with lots of energy and ideas, open for new knowledge. I am characterized by patience, accuracy and detail-oriented ("pick holes in smth"). I believe that there are always bugs that can be found! If you give me a chance I will try my best to show my skills and good value in the process of recruitment in your company.

Yours sincerely,
Adrian Augustyniak
